REGAIN IN CONTACT

A woman with dark hair, wearing a white turtleneck sweater, is shown in profile from the chest up, looking towards the right. In the foreground, a tablet computer is tilted, displaying a logo consisting of three overlapping circles (teal, dark teal, and light teal) with the word 'PLAY' in white capital letters on a dark teal circle. The background is a soft, out-of-focus green. Several large, semi-transparent circles in teal, grey, and yellow are scattered around the scene, some overlapping the woman and the tablet.

COWIN™ PLAY

POWERED BY **GRASP™**

DISCOVER THE NEW STANDARD IN TOMORROW'S CARE

IT'S TIME TO PLAY

With the CoWin™ Play, Recornect puts the powerful possibilities of the GRASP™ software platform within range of medium-security units in mental healthcare facilities.

ABOUT COWIN™ PLAY

CoWin™ Play came into being based on years of experience with the CoWin™ 32/48, a de-escalation solution, especially developed by Recornect for crisis units in psychiatry and forensic psychiatry. Impressive results have been achieved worldwide with this solution, leading to fewer containments and significantly lower work pressure in crisis units.

This success naturally led to a demand for a similar solution for regular psychiatric and mental health care facilities. The CoWin™ Play media wall is a well-balanced mix of interaction, education, relaxation and domotics. The media wall is rigidly built but finished for a lower security level, making the CoWin™ Play more affordable and more accessible.

THE GRASP™ SOFTWARE PLATFORM

The GRASP™ software platform is a groundbreaking new solution for crisis units in mental healthcare and was developed by experienced care professionals with a passion for engineering.

GRASP™ offers clients in crisis a customised selection of applications and new ways of communicating. This prospect of self-management results in faster restoration of contact in clients and consequently speeds up the client's recovery.

AVAILABLE IN 4 FRAME COLOURS

Lava

Sandbeige

Light Grey

Powderwhite

HIGHLIGHTS OF THE COWIN™ PLAY AND GRASP™

- 32-inch HD screen, landscape orientation
- Built-in camera, microphone and speakers
- Available in four colours: Lava, Sandbeige, Light Grey and Powderwhite
- Can be supplied with 8.7 mm or 4.7 mm thick laminated safety glass
- Can be built into new or existing pieces of furniture
- Communication (video) between client and care workers or family
- Basic applications such as unit information, appointment book etc.
- Document exchange
- Personal profile with extra apps such as TV, music, video or games
- Domotics applications - controlling temperature, lighting etc.
- User profiles for care workers with diverse admin rights
